Nathan Klingensmith

Senior Software Engineer

Motivated full-stack engineer and product designer with a passion for building web applications with incredible user experiences. A champion of agentic development, creating AI workflows that help teams ship faster. A proven leader in software delivery.

WORK HISTORY

Jellyfish

Boston, MA

Senior Software Engineer — Jul 2024 — present

- Architected configurable dashboards with an AI agent that builds them from plain language, now 10% of all page views
- Spearheaded AI Impact, a net-new product that became the lead offering in Jellyfish's sales motion
- Pioneered a suite of Claude skills for agentic AI workflows, increasing issue throughput over 25% across engineering

Software Engineer II — Jun 2023 — Jun 2024

- Co-architected DevEx, an experimental strategic initiative that turned into a released product with its own dedicated team
- Introduced color-token theming and OpenAPI-generated types, then championed adoption and refactors across the core product

Software Engineer — Jun 2022 — May 2023

- Led design and frontend development of Tunic, a realtime GitHub insights app built from the ground up and launched in 8 months

Co-Founder & CTO

Feb 2021 — Jul 2022

Pallyt Technologies

- Stewarded a 5-person team from Figma prototypes to two ecommerce web apps: a customer storefront and a vendor portal

Angular Web Developer

Aug 2019 — May 2022

Bio-CS Bridge Project

- Designed and built a platform for explorable high school curricula, iterating with teachers from mockups to launch
- Developed intuitive filtering and charting tools for a data platform to analyze 10,000 bumblebee observations
- Redesigned a mobile web app for recording bumblebee sightings, refining its UX and features for 100 monthly users

EDUCATION

Worcester Polytechnic Institute

Aug 2018 — May 2022

Bachelor of Science in Computer Science

GPA: 4.0/4.0, Dean's List Student
